For Beer & Beverage Jumper Lines

Increase your profits through better beer taste and quality by replacing jumper lines – it's the 1st step and lowest cost option with the greatest impact!

Safer, Longer Lasting, Medical Grade

The Brewers Association has recommended that draft beer dispensers and brewers stop using PVC tubing for jumper lines and anywhere else PVC is used, and change to PVC-free tubing due to PVC containing carcinogens from DEHP, BPA and other Phthalates (Plasticizers) used in the production of plastics. Further, PVC jumper lines are recommended for a maximum life of up to 2 years and can have a plastic taint/taste upon aging.

Polyurethane is PVC-free (NO DEHP, BPA and other Phthalates). **Prourethane™** is NSF-61 certified, made with high purity Urethane, and far outlasts vinyl – it's the best choice for draft beer lines/jumpers!

Transparent Polyurethane Tubing for Beer & Beverage Jumper Lines

- Free of DEHP, BPA, and Phthalates
- Rated for beer, wine, mixed drinks, kombucha and soda
- Exceptional resistance to sodium or hydroxide-based line cleaning chemicals
- No plastic taste in beer, wine, mixed drinks, kombucha or soda
- Ether-based raw material is listed by the National Sanitation Foundation (NSF 61, higher than NSF 51)
- Barrier properties to protect beer from oxygen ingress and CO2 egress
- Fungi resistance to Military Std MIL 810 STD
- Extremely resistant to weathering, tearing, impact, radiation, UV and abrasion; excellent flexibility
- Transparent glass-like clarity, flexible, resilient, tough, non-porous
- Longer usage time – far outlasts vinyl
- Wide range of temperature resistance: -85°F to 185°F
- Mirror smooth interior finish for outstanding flow

Made in U.S.A.

(50% Discount from Retail Price of \$16/Line)
Pricing Below Includes Installation!

* Average line size is 7 feet

# of Lines	Total Cost	Savings
6	\$ 268	\$ 262
7	\$ 313	\$ 306
8	\$ 357	\$ 349
9	\$ 402	\$ 393
10	\$ 447	\$ 437
11	\$ 491	\$ 480
12	\$ 536	\$ 524
13	\$ 581	\$ 568
14	\$ 625	\$ 611
15	\$ 670	\$ 655
16	\$ 715	\$ 699
17	\$ 759	\$ 742
18	\$ 804	\$ 786
19	\$ 849	\$ 830
20	\$ 893	\$ 873
21	\$ 938	\$ 917
22	\$ 983	\$ 961
23	\$ 1,027	\$ 1,004
24	\$ 1,072	\$ 1,048
25	\$ 1,117	\$ 1,092

of Lines: NO LIMIT on # of lines to replace! Includes clamps, 2 tail pieces and washers, if necessary. Minimum 6 Lines to qualify.
Total Cost: Includes cost of # of Lines plus Installation. **No additional fees for travel!**
Savings: Old PVC tubing/jumper lines should be replaced every 2 years, however, the new Prourethane™ lines far outlasts vinyl, so the calculation considers replacement every 4 years with the Prourethane™ lines (although should last longer), so the savings is PVC jumper line replacement (lines and labor) after 2 years.

ADDITIONAL DISCOUNTS AVAILABLE

If installed/serviced during installation of Prourethane™ jumper lines:

Stainless Steel Probe Couplers: ONLY \$21 each coupler, normally \$35 each – NO ADDITIONAL LABOR CHARGE!
 That's a 40% savings of \$14 each coupler!

Glycol Deck/Power Pack Service: ONLY \$149! Includes check glycol ratio, add additional glycol as needed up to 2 gallons (\$100 value), clean coils, check pumps and lines, check insulation, check pump/motor for signs of wear and/or potential failure that could cause down time.

Call PRO BEV® at (727) 710-4761 for more information or to schedule an installation!
